

**Hands** – Hand hygiene is still considered one of the most important practices in preventing the onward transmission of infectious agents including COVID – 19.

**Face** – IIR Face Masks must be worn on entry to any clinical areas by staff members. Visitors, including outpatients, to clinical areas must wear a IIR face mask.

**Space** – Maintain social distancing at two metres where possible. Transmission of the virus is most likely to happen within two metres.

**Ventilation** – Risk assess rooms and air flow, open windows where appropriate. This helps reduce the number of any potential virus particles in the air.

**Decision making based on Risk Assessment and Completion of COVID – 19 questionnaire where appropriate**

**NB. Diversion from these recommendations can only be approved by the Director of the area involved.**
