

Your healthcare provider is here for you

You may notice

Some delays in getting seen by your primary care providers this winter

Masks will be worn by the healthcare professional or you will be asked to wear a mask while in the healthcare setting

You may be seen by an alternative clinical practitioner such as an Advanced Nurse Practitioner

If you have a potentially infectious virus, you may be seen in a 'hot room' to reduce the spread to other areas of the clinic

Remember

Healthcare providers experience added pressures during the winter months but they remain committed to getting everyone seen by the right person at the right time.
